14 Project Experience

14.1 Project 1: Healthcare Analytics and BI Reporting - National Health Authority

a. Name of the client	National Health Authority
b. Work Area	Healthcare data analytics, business intelligence and reporting
c. Location of the assignment	New Delhi, India
d. Organization employing the individual	National Health Authority
e. Position Assigned	Senior Consultant
f. Role Played	Senior data analytics and BI consultant
g. About the Client & Business Challenges	Large, multi-source healthcare datasets required reliable extraction, validation and stakeholder-ready monitoring.
h. Tasks Handled	- Developed complex SQL queries on Amazon Redshift for data extraction and analysis. - Built interactive Power BI dashboards using DAX and business KPIs. - Performed data validation, reconciliation and root-cause analysis across multiple sources. - Automated reporting and supported stakeholders with accurate analytical insights.
i. Value Delivered to Client	Improved visibility of key indicators and enabled faster, evidence-based stakeholder review through reliable dashboards and automated reporting.
j. Start Year	2025
k. End Year (Year/Ongoing)	Ongoing
l. Client Reference	On request

14.2 Project 2: Aadhaar Authentication and Service Delivery Analytics

a. Name of the client	Unique Identification Authority of India (UIDAI)
b. Work Area	Digital identity analytics, KPI monitoring and dashboard development
c. Location of the assignment	India
d. Organization employing the individual	Unique Identification Authority of India
e. Position Assigned	Senior Analyst
f. Role Played	Data analyst and Power BI developer
g. About the Client & Business Challenges	High-volume Aadhaar transaction and service-delivery data required trend monitoring, anomaly identification and clear performance reporting.

h. Tasks Handled	- Developed and managed complex MySQL queries for extraction, transformation and reporting. - Analysed large datasets to identify authentication trends, anomalies, usage patterns and performance indicators. - Designed Power BI dashboards for authentication and service-delivery metrics. - Communicated findings to technical and non-technical stakeholders.
i. Value Delivered to Client	Provided actionable insights that supported operational monitoring and improved understanding of transaction and service-delivery performance.
j. Start Year	2023
k. End Year (Year/Ongoing)	2025
l. Client Reference	On request

14.3 Project 3: Client Campaign Analytics and Loyalty Reporting

a. Name of the client	Multiple client accounts supported through Easyrewardz
b. Work Area	Campaign analytics, customer loyalty reporting and data solutions
c. Location of the assignment	India
d. Organization employing the individual	Easyrewardz Software Services Pvt. Ltd.
e. Position Assigned	Data Analyst
f. Role Played	Campaign data analyst
g. About the Client & Business Challenges	Client teams needed timely campaign-performance data and tailored analytical outputs from operational databases.
h. Tasks Handled	- Extracted data continuously to meet client requirements and track campaign performance. - Compiled monthly campaign reports. - Performed initial data cleaning and executed database queries. - Delivered tailored data solutions based on client needs.
i. Value Delivered to Client	Enabled regular campaign tracking and supported client decision-making with cleaner data and targeted analytical outputs.
j. Start Year	2022
k. End Year (Year/Ongoing)	2023
l. Client Reference	On request

14.4 Project 4: MCA Portal, Database and Infrastructure Support

a. Name of the client	Ministry of Corporate Affairs
b. Work Area	E-governance portals, database maintenance, migration and infrastructure support
c. Location of the assignment	India
d. Organization employing the individual	Ministry of Corporate Affairs
e. Position Assigned	IT Consultant
f. Role Played	IT and data-management consultant
g. About the Client & Business Challenges	Government portals required dependable database updates, migration support, documentation and infrastructure security before deployment.

h. Tasks Handled	• Maintained MCA portals and updated databases regularly. • Managed data updates and migration using Python. • Created technical documentation for IT processes. • Maintained servers and applied security patches. • Validated, cleaned and extracted data to preserve flow and integrity.
i. Value Delivered to Client	Supported reliable portal operations, improved data integrity and strengthened deployment readiness through maintenance and security activities.
j. Start Year	2021
k. End Year (Year/Ongoing)	2022
l. Client Reference	On request
14.5 Project 5: Digital Campaign Performance Analytics	
a. Name of the client	Digital media and advertising clients
b. Work Area	Digital campaign analytics, performance optimization and reporting
c. Location of the assignment	India
d. Organization employing the individual	Digismart Digital Media Pvt. Ltd.
e. Position Assigned	Associate
f. Role Played	Campaign analytics associate
g. About the Client & Business Challenges	Campaign teams needed consistent performance tracking and data-driven optimization across client activities.
h. Tasks Handled	• Extracted meaningful insights from raw campaign data. • Prepared Excel trackers and performed detailed campaign optimizations. • Developed data-driven policies and strategies. • Collaborated with business and technical teams on operational implementation.
i. Value Delivered to Client	Improved campaign monitoring and supported performance optimization through structured reporting and data-led recommendations.
j. Start Year	2017
k. End Year (Year/Ongoing)	2021
l. Client Reference	On request

S. No	Position, Qualification & Experience as per ToR	Proposed Profile with Qualification & Experience	Relevant Past Experience (ABDM / Digital Health / Rajasthan Ecosystem)	Compliance
1	MIS/Data Analytics Expert - BE/B.Tech OR MCA OR MBA/PGDM OR MPH from recognized university 6+ Years	Anurag Yadav - PGDM, IT & Operations - B.Tech (Information Technology) 8+ years of experience	NHA, MoHFW, GoI - Healthcare Analytics & BI Reporting: Developed Power BI dashboards, KPI frameworks, automated reporting solutions, and healthcare analytics models to support evidence-based decision-making and programme monitoring.
